Veggie Bites

Herbivore Cubes

DESCRIPTION

Herbivore Cubes are used in the feeding of a wide variety of exotic herbivores including camel, bison, llama, tapir, rhinoceros, elephant, hippopotamus, zebra, kudu, antelope, gaur, and yak. Developed by zoo nutritionists, this diet has been fed for over 25 years and is a trusted feed for many local zoos.

FEATURES AND PROVEN BENEFITS

- Low-glycemic feed
- Chelated minerals for maximum absorption
- High-quality ingredients
- Freshness guaranteed

INGREDIENTS

Wheat shorts, soybean meal, oat screenings, soy hulls, ground wheat, alfalfa, barley, beet pulp, ground flax, limestone, wheat middlings, calcium pantothenate, magnesium oxide, vitamin E, flavour, copper sulfate, zinc oxide, yeast, mineral oil, manganese oxide, ferrous sulfate, selenium, choline chloride, vitamin A, folic acid, niacinamide, vitamin B₁₂, vitamin D₃, biotin, riboflavin, calcium iodate, thiamine, cobalt sulfate, ENDOX (antioxidant) pyridoxine HCl, menadione, calcium lignosulfonate, sodium chloride, potassium sulfate, magnesium sulfate, dicalcium phosphate, calcium propionate, calcium silica, zinc amino acid complex, selenium yeast, manganese amino acid complex, copper amino acid complex, cobalt amino acid complex

PRODUCT FORM

Cube

PACKAGING

20kg bags

FEEDING INSTRUCTIONS

Züküdla Herbivore Cubes were designed to provide all the necessary nutrients required by herbivores in captivity. They are a complete diet that may be used in combination with forage such as timothy hay and limited produce items (training/treats) for a complete, balanced diet. A typical herbivore diet consists of 35% pelleted diet (fed at 1.5 - 2.5% body weight) and 65% grass hay (ad lib). Provide a source of clean, fresh water at all times.

Züküdla Herbivore Cubes can also be used as a supplement to increase the fibre level in a diet. For example, exotic swine diets can be improved by replacing 20% of your standard hog ration with Züküdla Herbivore Cubes. For suggested feeding amounts and instructions for a particular species contact us for more information. We can help you to create a balanced feeding program for your collection.

STORAGE

Dry, pelleted feeds should be stored under clean, dry, ventilated conditions, and out of direct sunlight to protect against high temperatures, humidity, moisture, insects and rodents. Store feed bags on wooden pallets and maintain several inches between pallets and surrounding walls to ensure adequate ventilation. Ideally, feed should be used within two months of manufacture.

Guaranteed Analysis

Moisture (max.)	11%	Calcium	0.9%
Crude Protein (min.)	16%	Phosphorus	0.5%
Crude Fat (min.)	3.5%	Vitamin A	16,000IU/kg
Crude Fiber (max.)	15%	Vitamin E	200IU/kg

Approximate Nutrient Composition (As-fed)

Dry matter (%)	89.44	Mn (mg/kg)	107.89
Crude Protein (%)	16.10	Zn (mg/kg)	222.55
Crude Fat (%)	3.72	Se (mg/kg)	1.4
Crude Fibre (%)	14.43	A (KIU/kg)	16
Ca (%)	0.90	D ₃ (KIU/kg)	5.1
P (%)	0.52	E (IU/kg)	200
P available (%)	0.22	Arginine (%)	1.06
Na (%)	0.28	Lysine (%)	0.82
Cu (mg/kg)	55.87	Methionine (%)	0.23
